OBJECTIVE:

Aspiring Full-Stack Developer with hands-on experience in HTML, CSS, Bootstrap, PHP, Laravel, Firebase, MySQL, REST APIs, and jQuery. Skilled in building responsive web applications and integrating backend logic with modern UI. Currently enhancing problem-solving through DSA in C++, while learning,Next.js and Python to expand my tech stack. Eager to contribute to impactful projects, learn from industry experts, and grow as a well-rounded developer.

TECHNICAL SKILLS:

- Frontend - HTML5, CSS3, JavaScript, Bootstrap, jQuery,Next.js (learning)
- Backend - PHP, Laravel, RESTful APIs
- Database - MySQL, Firebase, phpMyAdmin
- Programming Languages - C++, Python (learning)
- Tools & Platforms - Git, GitHub, VS Code, XAMPP, MAMP, cPanel, Postman

SOFT SKILLS:

Leadership | Communication | Team Collaboration | Adaptability | Voice-over Artist (provided professional voice-overs for marketing ads in an IT company)

PROJECTS:

- **New-Site – Content Management Web Application**  
Developed a dynamic platform where users can publish posts and admins manage content  
Implemented authentication, role-based access, and content moderation  
Tech stack: **PHP, MySQL, HTML5, CSS3**  
Focused on clean backend logic and database integration for content workflows
- **Healthcare – Mental Wellness Platform**  
Built a health-focused web app featuring an **AI chatbot**, SOS button, calming music, and mental wellness quizzes  
Integrated **Firebase** for real-time data handling and user management  
Tech stack: **React, TypeScript, Firebase**, external **REST APIs**  
Designed for mobile responsiveness and accessibility
- **E-Commerce Web Application**  
Created a full-stack shopping website with product catalog, cart, and secure checkout  
Built with **Laravel** for backend and custom responsive frontend  
Features: User authentication, product management, order tracking  
Emphasis on performance, UX, and secure data handling
- **AquaInsight – AI-Driven Ocean Data Platform** (*Smart India Hackathon 2023*)  
Collaborated in a team to develop a real-time platform for oceanographic, fisheries, and biodiversity data  
Integrated **Gemini API** and multiple live data sources to drive insights  
Tech stack: **React, TypeScript, Gemini API**, live datasets  
My role: Full-stack development, UI integration, and API handling  
Selected Top20 and showcased as part of **Smart India Hackathon**, 2025 edition
