## ABOUT ME

I am a motivated college student and Full Stack Developer with 1 year of real-world experience building web applications using PHP, Laravel, MySQL, HTML, CSS, jQuery, and Bootstrap. Passionate about the intersection of AI and full stack development, I enjoy integrating intelligent features into modern applications while also focusing on Python for future-ready solutions. Currently strengthening my Data Structures & Algorithms (C++) skills to improve problem-solving and algorithmic thinking. With strong analytical ability, effective communication, and adaptability, I am eager to contribute innovative, scalable solutions while continuously learning and growing.
